Dear Tammy,

I want to take this opportunity to thank you for helping me to have my own little piece of heaven. I love my Greenhouse !!

As you may recall, I am a professional person by occupation and I research all of my options before making any decisions. So naturally, I researched my greenhouse options for approximately three years! I found you and your company, Advance Solar LLC, to be of the highest quality. You informed me that you had an ISO Quality Assurance System in effect, which I verified, and also, I found that you were in good standing with the Louisiana Secretary of State. Tammy, you followed through quickly and efficiently with all questions and requests, and moreover, you were always pleasant! At the time of delivery, you accommodated my needs in reference to delivery at my door, not at the curb side, as I have a very long driveway. Every part of the Greenhouse kit was present and packed perfectly with clear building instructions. I took pride in building the Greenhouse by myself (my husband did help me out of some difficult situations and helped me lift heavy pieces along with our daughter). However, when he was not home, you were just a phone call away and always knew the answers!

I thoroughly enjoyed building my Green 8x10 Greenhouse, and I would purchase it again from you without hesitation. I very highly recommend your company and the Greenhouses to anyone who would like a little piece of Heaven!!!

Gardeningly,
Kathy (Lake Isle)
